

Kevin Pageau

pageau.kevin@gmail.com

Software engineer with over a decade of experience building scalable web applications and backend services, proficient in CI/CD. Known for driving change through collaboration, delivering efficient, well-documented solutions, and continuously improving engineering workflows to boost productivity and scalability.

Experience

Senior Backend Engineer @ Ubisoft 2024 - Present

- **Led development of critical GraphQL API:** Led a team in building a mission-critical TypeScript/Node.js/GraphQL API powering an in-game store used by millions of users monthly, contributing to architectural decisions, performance testing, and observability setup.
- **Reduced user login wait time:** Led the development of a feature that halved login times for Ubisoft's Connect client's store, improving user experience.
- **Facilitated contributor onboarding:** Authored a comprehensive contributor's guide, streamlining onboarding for new team members and improving project maintainability.

Backend Engineer @ Ubisoft 2020 - 2024

- **Designed and implemented critical GraphQL API:** Contributed, as part of a cross-functional team, to the architecture and initial production features of a critical TypeScript GraphQL API, ensuring a solid foundation for growth and maintainability.
- **Accelerated delivery for product teams:** Built and maintained over 30 reusable PHP packages that empowered product engineering teams, significantly improving delivery speed.
 - Led initiative to create CLI Go tools to automate tasks across packages, reducing maintenance time.
- **Improved CI/CD pipelines:** Developed shared GitLab CI configurations for both packages and applications, ensuring consistency between local development environments and deployment pipelines. Integrated Docker support, simplifying development workflows and enabling seamless deployment.

Full-Stack Web Developer @ FlightHub 2020 - 2020

- **Maintained high-traffic websites:** Developed and maintained desktop and mobile sites for FlightHub.com and JustFly.com using PHP, JavaScript, and React, supporting tens of thousands of daily users.
- **Rapid platform delivery:** Delivered the frontend for a new self-serve platform in under a week.

Full-Stack Web Developer (self-employed) 2018 - 2020

- **Web development:** built and maintained client websites, tailored for clients' needs.

Full-Stack Web Developer @ Momentum Travel Group 2016 - 2018

Full-Stack Web Developer @ Kanga Media 2014 - 2016

Projects

InterviewQs 2020 - Present

Maintain and develop InterviewQs, a platform providing curated interview questions for data science professionals. Built the current version from the ground up using Next.js for the frontend and Go for backend services, including an automated newsletter system delivering content to over 100k subscribers.

Education

Computing Support DVS @ CFP des Riverains

2013-2014
